

DANANG ADI NUGROHO

Cloud DevOps Engineer

Jakarta, Indonesia | danangadi2005@gmail.com | +62 857-1891-7735 | [linkedin.com/in/danangadi](https://www.linkedin.com/in/danangadi) | github.com/dananggadii

PROFESSIONAL SUMMARY

Cloud DevOps Engineer (L2) at Aku Mitra Digital with 2+ years of experience designing, migrating, and managing multi-cloud infrastructure (AWS, GCP, and Alibaba Cloud) for enterprise clients. Skilled in building CI/CD pipelines, implementing observability (Prometheus, Grafana), and leading infrastructure projects from POC through production. Promoted from L1 to L2 within 9 months. Currently deepening DevSecOps practices while pursuing a bachelor's degree in information systems.

AWARDS & RECOGNITION

- Best SPMB Indonesia — SI SPMB Jawa Tengah infrastructure & observability project (2026).
- Best Engineer Certification 2025—8 certifications earned in a single year.

EDUCATION

Bachelor of Information Systems—BINUS Online Learning 2026–2029 (in progress, semester 1)

SMKN 26 Jakarta—Information System, Network, and Application | Final grade: 89.40

WORK EXPERIENCE

Cloud DevOps Engineer (L2)—Aku Mitra Digital, *January 2026–Present*

- Lead infrastructure and observability for a provincial-scale government system (SI SPMB Jawa Tengah), supporting 600,000 concurrent users during peak admission season.
- Set up and configure a Plane (project management) system on GKE for internal company use.
- Deployed an HRIS application on GKE for internal company use.
- Implement a Tender POC on GCP using Cloud Native GKE and a CI/CD pipeline for a regional banking institution.
- Set up an industrial manufacturing company's production environment on AWS (VPC, EC2, EBS, backup lifecycle policies, RDS, CloudTrail, and S3 for logging).
- Deployed and tested an application on a VPS using Docker Compose and a GitHub Actions CI/CD pipeline for a legal services firm.
- Deploy a billing dashboard application for a customer using Docker Compose and GitHub Actions, ahead of a planned migration to GKE.
- Implemented a Kubernetes environment (ACK, SLB, RDS for PostgreSQL, and Redis) on Alibaba Cloud for a smart multi-finance company.
- Implemented an ARMS POC on Alibaba Cloud using the Managed Service for OpenTelemetry for Diskominfo Semarang.

Also earned 3 professional certifications (GCP, AWS, and BytePlus) during this period.

L1 Cloud Engineer—Aku Mitra Digital, *April 2025–December 2025*

- Assessed Alibaba Cloud infrastructure (ECS, networking, ACK, database, CEN) to evaluate migration readiness for a fintech lending company.
- Redesigned legacy application architecture on GCP and migrated all services to GKE for the internal company environment.
- Built a secure CI/CD pipeline using Artifact Registry, Cloud Build, and Cloud Deploy for the internal company environment.
- Delivered multi-cloud infrastructure across 4 cloud providers (GCP, AWS, Alibaba Cloud, and Tencent Cloud) for 8 client projects, covering networking, compute, database, storage, and containers.
- Integrated Prometheus with Alibaba ECS and configured GCP monitoring for production applications.
- Managed multi-cloud IAM following the principle of least privilege.
- Implemented a development environment on AWS (VPC, EC2, EBS, lifecycle policy) for a manufacturing client.
- Developed Alibaba Cloud training modules (ApsaraDB, security, RAM).

- Implemented a provincial-level student admission system on Alibaba Cloud for SPMB Jawa Tengah—Diskomdigi Jateng.
- Troubleshoot production issues (agent failures, performance spikes) and managed snapshots for disaster recovery needs.

Also earned 8 certifications in 2025.

Cloud Engineer Intern—Aku Mitra Digital, May 2024–March 2025

- Migrated critical workloads (EC2 instances, S3 buckets, MongoDB Atlas, Cloud SQL) from AWS and GCP to Alibaba Cloud with minimal downtime and preserved data integrity for a property rental platform.
- Developed a scalable company-profile Web API using NestJS, Prisma ORM, and PostgreSQL.
- Implemented an end-to-end monitoring solution (Prometheus, Grafana, Wazuh dashboard + agents) on Debian, Ubuntu, and Windows Server on GCP for a customer-facing security POC.
- Prepared monthly multi-cloud SLA compliance reports (Alibaba Cloud, AWS, and Google Cloud) to support performance monitoring across customer environments.

FEATURED PROJECTS

- Multi-Cloud Migration to Alibaba Cloud (a property rental platform)—migrated EC2, S3, MongoDB Atlas, and Cloud SQL with minimal downtime.
- Legacy Application Modernization to GKE (Aku Mitra Digital)—architecture redesign and secure CI/CD via Artifact Registry & Cloud Build.
- Cloud-Native Tender POC on GCP (a regional banking institution) — GKE implementation with a CI/CD pipeline.
- AWS Production Environment (an industrial manufacturing company)—VPC, EC2, EBS, RDS, CloudTrail, S3 with backup lifecycle policy.
- Infrastructure & Observability Project Lead (SI SPMB Jawa Tengah 2026)—Alibaba Cloud, Grafana, Prometheus, Aliyun exporter; supporting 600,000 concurrent users at peak.
- Kubernetes on Alibaba Cloud (SmartMulti Finance)—ACK, SLB, RDS for PostgreSQL, Redis.
- ARMS/OpenTelemetry Observability POC (Diskominfo Semarang) — Managed Service for OpenTelemetry on Alibaba Cloud.
- VPS Deployment via Docker Compose & GitHub Actions (a legal services firm)—end-to-end CI/CD on a VPS.

CERTIFICATIONS

- AWS Certified DevOps Engineer – Professional
- AWS Certified Solutions Architect – Associate
- AWS Certified Associate SysOps Administrator
- AWS Certified Cloud Practitioner
- Google Cloud Certified Professional Cloud Architect
- Google Cloud Certified Professional Cloud DevOps Engineer
- Google Cloud Certified Professional Cloud Network Engineer
- Google Cloud Certified Professional Cloud Security Engineer
- BytePlus Cloud Essentials
- GitHub Foundations

TECHNICAL SKILLS

Cloud Platforms: AWS, GCP, Alibaba Cloud

Infrastructure & Orchestration: Linux, Docker, Kubernetes, Helm

Networking: Nginx, Traefik

CI/CD: GitHub Actions

Monitoring & Observability: Prometheus, Grafana

Version Control & Scripting: Git, Python
